

**Emine Guler Celik** is Assistant Professor at the Department of Bioengineering in Ege University. She received her PhD in Biochemistry from the Ege University, in 2017. During her post-doctoral period, she had 4-years of experience in molecular genetic field as Project Development and International Business Manager. Her main domains of expertise are lateral flow assay development, synthesis and modification of biofunctional nanoparticles/surfaces, design of electrochemical biosensors, point-of-care diagnostics etc. She is the co-author of more than 40 research articles on biosensors and diagnostics. She has just begun to lead a new research group called “DiaBioSense: Diagnostic Devices and Biosensors Laboratory”. She has also been the co-founder of a start-up company since 2021.
