

Sezer Özerinç is currently an Associate Professor of Mechanical Engineering at Middle East Technical University (METU) located in Ankara, Turkey. Dr. Özerinç obtained his B.S. and M.S. degrees from METU in 2008, and 2010, respectively. He completed his Ph.D. at the University of Illinois at Urbana-Champaign in 2015. He joined METU Mechanical Engineering in 2016, where he established the Nanomechanics Laboratory. His research focuses on exploring novel materials and structures with the aim of understanding and improving the mechanical behavior. He is the recipient of METU Development Foundation Young Researcher Award in 2022 and has co-authored 27 journal articles with 1200+ citations.
