

**Tommaso Salzillo** is Senior Assistant Professor at University of Bologna awarded by Rita Levi Montalcini 2020 Fellowship. He graduated in Industrial Chemistry in 2011 and he received his Ph.D. in physical chemistry in 2015 from the University of Bologna. He was Marie Curie Postdoctoral Fellowship in 2017 at Institut de Ciència de Materials de Barcelona (Spain) studying the polymorphism and morphology control in flexible organic electronic devices. From 2020 he was Senior Koshland Postdoctoral fellowship at Weizmann Institute of Science (Israel) performing studies on the structural dynamics of functional materials such as organic crystal and chalcogenide perovskites by means of low-wavenumber Raman spectroscopy. His research interests include polymorphism in molecular materials, solid-state photoreactions and vibrational spectroscopy.
